Amir Nissim

Web Developer

http://bit.ly/amirn

I care about code.
I love the web. I love making things. I build webapps.
I am a curious and diligent self learner, a manager of one who always pays great attention to detail.

Experience

Javascript Architect, Android n00b | Everything.me '13-Now

Collaborated with Mozilla front-end team in building Firefox OS — an open source HTML5 based mobile OS — using bleeding edge web technologies, ES6 Javascript and Web APIs. Learned how the big guys roll: code reviews, development process, testing methodologies.
Moved on to Android development and mobile Automation.

Frontend & Backend Engineer | WAYbetter '11-'13

Joined an early stage startup and was involved in all aspects of the product. I was half the development team who built the entire tech stack of the service - front to back.
Took major part in making product decisions about UI, UX, marketing, and customer relations.

JavaScript Developer | Davidson Institute of Science Education '10

My first encounter with JavaScript while developing math games.

Web Developer | Self Employed '05-'08

Started out building websites for friends using HTML, Flash and ActionScript. Discovered my love for graphics exploring Photoshop.

Education

M.Sc. Computer Science | Weizmann Institute of Science '08-'10

Spent 2 years amongst the smartest people in Israel. Learned how to do research and how to present my work.
Published my Thesis on FUZZIEEE '12. GPA 95.

B.Sc. Mathematics | The Hebrew University '05-'08

Learned how to think abstractly and to appreciate the beauty of rigor. Topology was my favorite course. GPA 87.

Extracurricular

Civil Hacker | The Public Knowledge Workshop '12-Now

Volunteer as web developer to help liberating government data.

Volunteer | Israel Bicycle Association '09-'11

Volunteered for making Israel more bicycle friendly. Gained experience in working with bureaucratic companies and officials.
